

Helping you to live

Why Us

We are accessibility consultants and contractors that specialize in accessibility solutions, improving quality of life, while creating inclusive living. We bring an innovative approach to the home, workplace and vehicle modification industry, acting as liaison for funding agencies, healthcare service providers, personal injury lawyers, and end user; the client. Our goal is to meet and exceed your expectations by offering outstanding customer service, value, flexibility, and peace of mind.

ADL is involved in every stage of the process, from initial referral, assessment, estimation, project management, and implementation.

Our extensive skills and knowledge encompass all aspects of the growing need for our services. Our associates are distinguished by their functional and technical expertise, combined with their hands on experience, ensuring that you receive the most effective and professional service.

Unlike others, we possess the knowledge of the 'why' and the 'how'. Our associates understand the complete process required to initiate and finalize each and every project. With over 25 years of experience directly related to construction, design, restoration, project management, rehabilitation, catastrophic loss, case management, insurance claims, personal injury, training and consulting.

ADL is able to provide you the safety and security you deserve.

Home Accessibility, Alternative Living and Vehicle Assessment Reports

Our team specializes in accessible solutions, creating inclusive living for individuals with visible and non visible disabilities and their families. We provide industry-leading assessments that accurately determine the limiting factors to accessibility, providing safe and cost-effective solutions.

Our expertise with insurance related assessments (SABS, WSIB) and medical-legal assessment reports provide positive results for our clients.

Motor Vehicle Modifications

In our society, our way of life, we have come to depend on transportation. Access to a vehicle has made living and working easier, but creating and providing an accessible vehicle, will restore independence inclusion to those who require it.

We are constantly working with the top manufacturers of accessible vehicles in the country. Our technical staff will work with you to identify needs and implement solutions specific to your needs.

Our technical staff has provided expert support and opinion to the Canadian Standards Association CSA for accessible vehicles and wheelchair safety.

Project Management

The first step, and perhaps the most intimidating step in managing a successful project is to accurately define the scope and cost.

Our team is committed to supporting you throughout the entire process. It is our responsibility and promise to provide all the information necessary to satisfy your needs and provide peace of mind.

We will:

1. Understand the needs of your project.
2. Substantiate and justify your project.
3. Outline what your project will accomplish.
4. Accurately determine time line(s) of your project.
5. Establish the budget and required resources for your project.
6. Reach Consensus and agreement on the scope of your project.

Construction

Considered the “foundation”, our construction services represent the culmination of our multi-faceted company.

Our team of accessibility consultants, architects, engineers and professional trades deliver and fulfill our vision of inclusive design.

Our ability to handle **residential, retail, institutional (schools, hospitals) and commercial projects** has qualified Accessible Daily Living as a **leader in accessibility and inclusive design as it relates to the built environment.**

Lifting Solutions

Ceiling lifts provide mobility for those who find it difficult to safely move themselves or others. The tracks of the ceiling lift can be curved or straight, and can also run from room to room. They are ideal when floor space is limited. The most common places for ceilings are the bathroom and bedrooms. The transfer to and from the toilet and bathtub is made much easier with a ceiling lift.

The transfer from the bed to wheelchair or scooter is also made easier with the ceiling lift.

Stair Glide or a stair lift is the way to transport a person from floor to floor while seated. Stair glides are usually attached to one side of the stairs and run electrically on a track. Stair glides are available for indoor and outdoor use. Stair glides are available for straight, 90 degree and custom curved staircases. They can be implemented for indoor and outdoor use.

A Vertical Platform Lift, commonly called a 'Porch Lift,' is the solution for the difficulty, or inability to use the stairs. Typically installed alongside the porch, this unit will raise, or lower you, on and off your porch or deck. A Vertical Platform Lift may also be installed inside the home or work place, for easy transitions from one floor to the next.

AODA - Accessibility for Ontarians with Disabilities Act, 2005

One in seven people in Ontario have a disability. Over the next 20 years that number will rise as the population ages. Creating a province where every person who lives or visits, can participate fully, makes good sense - for people, for businesses, and for our communities. Ontario's businesses, organizations and communities, are working to become more accessible and closer to people with disabilities.

Accessibility is the law in Ontario

The accessibility standards for the built environment focus on removing barriers into areas:

- 1) Public Spaces
- 2) Buildings

Enhancements to accessibility in buildings will happen at a later date through Ontario's Building Code, which governs new construction and renovations in buildings. We are fully certified with all standards related to the disability act.

Educate

Understanding our services and products will help you recognize your needs. This will allow you to act rather than react.

Advocate

Our goal is to provide support and awareness and create an inclusive society for all. Accessible Daily Living is an active member of the community with affiliations to groups and not-for-profit organizations improving and growing the representation for individuals with visible and non-visible disabilities.

Develop

It is important through planning and development that we satisfy present needs without forsaking or compromising those for the future. We work closely with community partners, healthcare practitioners, and local governments to establish a benchmark for inclusive design.

Implement

It is our belief in you, having faith in our processes, that we are able to see the end result. We will return that call today, rather than tomorrow, we will always have your best interest in mind and in the end we will thank you for the opportunity and privilege of making a difference in your life.
